Notes:

(1) The Integrated Waste Management Act (IWMA), also known as AB 939, required each jurisdiction on the state to submit detailed solid waste planning documents for approval by the California Integrated Waste Management Board (CIWMB), and set requirements that agencies divert 50 percent of solid waste from landfills by 2000. The Board is authorized to extend agency compliance deadlines based on good-faith efforts and special circumstances.
 (2) Represents the proportion of the local agency's waste that was disposed at this particular site.

LOS ANGELES MUNICIPAL SERVICE
 CITY OF BEVERLY HILLS
 APPENDIX A

Stormwater Service

Service Configuration			
Stormwater Maintenance	Direct		
Flood Control	LACFCD		
Drainage System			
Storm drains flow to Los Angeles River Watershed.			
NPDES Program Implementation FY 03-04¹			
Public Information	Completed	Development Construction	Completed
Development Planning	Completed	Illicit Connections/Discharges	Completed
Annual Workload FY 03-04¹		Service Adequacy FY 03-04¹	
# of City-owned Inlets	1,415	Inlet Inspection Rate	5.7
# of Inlet Inspections	7,960	% of Inlets Labeled No Dumping	99%
Total Waste Removed from Inlets	26 tons	Illicit connections response time	NP
# of Calls Received	39	Illicit discharge response time	15 minutes
# of Events/Workshops Attended	4	Overall Self Rating ²	10
Facilities			
Infrastructure Description		Needs/Deficiencies	
NP		The City needs rehabilitation of deteriorated or undersized storm drains citywide, and has an ongoing funded program to address the problem gradually (\$50,000 annually).	
<p>(1) Information is based on Los Angeles County Regional Water Quality Control Board's FY 03-04 Municipal Stormwater Permit Annual Reports.</p> <p>(2) Agencies are asked to rate their level of compliance with their stormwater permit on a one to 10 scale as part of their annual report to the Regional Water Quality Control Board.</p>			

Street Service

Service Configuration		System Overview	
Street Maintenance	Direct	Street Centerline Miles ²	99
Street Lighting	Direct	Arterials	11
Street Sweeping	Direct	Collectors	5
Traffic Signals	Direct	Local Roads	83
Service Demand		Rural Roads	0
Daily Vehicle Miles of Travel ¹	599,280	Signalized Intersections	94
DVMT per Street Mile ¹	6,045	Street Lights	5,683
Street-Related Expenditures³			
Street Maintenance	\$80,312	Lights & Signals	\$39,080
Infrastructure Needs/Deficiencies			
<p>The City needs street resurfacing and reconstruction, as well as asphalt, gutter, curb, sidewalk, and catch basin repair citywide and has an ongoing funded program to address these needs (\$2 million annually). A similar program addresses the installation of traffic signals, which averages about \$500,000 annually.</p>			
Service Challenges			
<p>A large volume of traffic uses the east-west arterials. Through traffic between the City and San Fernando Valley uses local roads not designed to handle the capacity. Up to 14 of 35 key intersections operate at level of service E or F at some point during the day.</p>			
<p>Notes:</p> <p>(1) Daily vehicle miles of travel (DVMT) in 2004, according to the California Department of Transportation.</p> <p>(2) Miles of public roads for which the local agency bears maintenance responsibility, according to the California Department of Transportation Highway Performance Monitoring System.</p> <p>(3) Street maintenance and reconstruction expense, as reported in the FY 03-04 Annual Street Report to the State Controller.</p>

Notes:

(1) The Integrated Waste Management Act (IWMA), also known as AB 939, required each jurisdiction on the state to submit detailed solid waste planning documents for approval by the California Integrated Waste Management Board (CIWMB), and set requirements that agencies divert 50 percent of solid waste from landfills by 2000. The Board is authorized to extend agency compliance deadlines based on good-faith efforts and special circumstances. (2) Represents the proportion of the local agency's waste that was disposed at this particular site.

# of Calls Received	9	Illicit discharge response time	24 hours
# of Events/Workshops Attended	17	Overall Self Rating ²	9
Facilities			
Infrastructure Description		Needs/Deficiencies	
5 miles of closed storm drains and 0 miles of open channels maintained by the City.		The City needs capital improvements for stormwater discharge and other stormwater related programs; the project is funded (\$2.3 million) and scheduled for completion by FY 08-09. Bakersfield Ave. requires regrading and resurfacing to ensure proper storm drainage. Sewer replacements are needed throughout the City.	
(1) Information is based on Los Angeles County Regional Water Quality Control Board's FY 03-04 Municipal Stormwater Permit Annual Reports. (2) Agencies are asked to rate their level of compliance with their stormwater permit on a one to 10 scale as part of their annual report to the Regional Water Quality Control Board.			

Street Service

Service Configuration		System Overview	
Street Maintenance	Direct	Street Centerline Miles ²	84
Street Lighting	Direct	Arterials	27
Street Sweeping	Contract	Collectors	6
Traffic Signals	Direct	Local Roads	52
Service Demand		Rural Roads	0
Daily Vehicle Miles of Travel ¹	702,040	Signalized Intersections	104
DVMT per Street Mile ¹	8,309	Street Lights	3,774
Street-Related Expenditures³			
Street Maintenance	\$60,668	Lights & Signals	\$17,955
Infrastructure Needs/Deficiencies			
Curb, gutter, and sidewalks are replaced on an ongoing basis (\$160,000 annually). Existing asphalt alleyways are in poor condition and require resurfacing (\$100,00 annually). The Higuera Street Bridge needs to be widened but is unfunded. Streets throughout the City needs resurfacing.			
Service Challenges			
Congestion within the City occurs mostly due to intersection constraints rather than lack of roadway capacity between intersections.			
Notes:			
(1) Daily vehicle miles of travel (DVMT) in 2004, according to the California Department of Transportation.			
(2) Miles of public roads for which the local agency bears maintenance responsibility, according to the California Department of Transportation Highway Performance Monitoring System.			
(3) Street maintenance and reconstruction expense, as reported in the FY 03-04 Annual Street Report to the State Controller.

DVMT per Street Mile ¹	5,378	Street Lights	11,228
Street-Related Expenditures³			
Street Maintenance	\$18,593	Lights & Signals	\$3,711
Infrastructure Needs/Deficiencies			
Curb ramps arenneded throughout the City for ADA complinace. Street rehabilitation and reconstruction and curb, gutter and sidewalk repair are needed throughout the City; the program is funded \$1.5 million annually.			
Service Challenges			
Glendale population and employment has grown; however, Glendale has not had a commensurate increase in the capacity of its street system. Streets have not been substantially widened because of narrow public rights-of-way which were created as part of Glendale's original subdivisions.			
Notes:			
(1) Daily vehicle miles of travel (DVMT) in 2004, according to the California Department of Transportation.			
(2) Miles of public roads for which the local agency bears maintenance responsibility, according to the California Department of Transportation Highway Performance Monitoring System.			
(3) Street maintenance and reconstruction expense, as reported in the FY 03-04 Annual Street Report to the State Controller.

Total Local Park Acres per 1,000 Residents	4	Full Time	1,977
Total Park Acres per 1,000 Residents	4	Part Time	8,000

Infrastructure Needs/Deficiencies

The Sepulveda Basin is in need of park space development. As of November 16, 2005, the City's Recreational and Cultural Facilities Program (RCFP) awarded five new parks projects. According to the Recreation and Parks Department, the overall grade of the City's park system is a C. As of January 2006, the RCFP is currently managing 137 projects throughout the City. The Ardmore Recreation Center needs expansion of the gymnasium and other upgrades.

*Note: Total Park Acres is the total of local parks, school, and county park acres

Response Time Note	Based on all dispatched calls.		Staffing Base Year	2005
FBI Crime Clearance Rate	50%	Marked Patrol Vehicles	1,205	
Infrastructure Needs/Deficiencies				
<p>In 2002, voters approved Proposition Q, a City-wided Public Safety Bond Measure to improve Police and Fire facilities. Hollenbeck, Rampart, West Valley, and Harbor Division Stations require replacement as well as the Metro Detention Center. \$231.3 million was approved in September 2006 for a new 11-story police headquarters (Parker Center).</p>				
Service Challenges		New Facilities		
<p>Areas within the San Fernando Valley have longer response times due to size of the divisions, which requires further travel distances to respond to service calls. Dense population during peak traffic hours in the West Los Angeles area contributes to longer response times. 911 calls originating from cell phones are answered by CHP, then dispatched to the proper jurisdiction. CHP has an antiquated system resulting in with long answer times. Redirection of calls directly to LAPD would drastically reduce response times.</p>		Hollenbeck Replacement Station

Notes:

- (1) The Integrated Waste Management Act (IWMA), also known as AB 939, required each jurisdiction on the state to submit detailed solid waste planning documents for approval by the California Integrated Waste Management Board (CIWMB), and set requirements that agencies divert 50 percent of solid waste from landfills by 2000. The Board is authorized to extend agency compliance deadlines based on good-faith efforts and special circumstances.
 (2) Represents the proportion of the local agency's waste that was disposed at this particular site.

Facilities			
Infrastructure Description:			
1,200 miles of closed storm drains and 9.4 miles of open channels maintained by the City.			
Needs/Deficiencies:			
Several stormwater infrastructure upgrades and facilities are needed for the City to address the wet weather bacteria TMDL. The implementation is expected to take 18 years and cost about \$1.56 billion. The project will include construction of a large runoff treatment facility capable of handling 2.3 billion gallons of runoff, the diversion of wet weather flow to Hyperion and an Integrated Resources Plan. The project will be funded mostly by the City's current stormwater fee on property taxes and other projects related to Federal Clean Water Act requirements. The City must comply with 67 TMDLs in the next 25 years at an estimated cost of \$8-10 billion (\$400 million annually over 25 years).			
(1) Information is based on Los Angeles County Regional Water Quality Control Board's FY 03-04 Municipal Stormwater Permit Annual Reports.			
(2) Agencies are asked to rate their level of compliance with their stormwater permit on a one to 10 scale as part of their annual report to the Regional Water Quality Control Board.			

Street Service

Service Configuration		System Overview

Street Lighting	Direct	Arterials	1,761
Street Sweeping	Direct	Collectors	1,143
Traffic Signals	Direct	Local Roads	3,984
Service Demand		Rural Roads	47
Daily Vehicle Miles of Travel ¹	44,116,190	Signalized Intersections	4,000
DVMT per Street Mile ¹	6,361	Street Lights	218,248
Street-Related Expenditures³			
Street Maintenance	\$52,702	Lights & Signals	\$17,518
Infrastructure Needs/Deficiencies			
<p>Alameda Street from 25th Street to Slauson Ave. is in need of major reconstruction, estimated cost is \$8.8 million; there is currently no funding for the project. Aviation Blvd. needs to be widened from Imperial Highway to Arbor Vitae Street to reduce traffic congestion caused by the opening of the 105 freeway; estimated at \$61.7 million, the project is expected to be funded partially by gas taxes and by the LA Airport, but most of the funds are not yet identified. A grade separation and the extension of Satcoy Street is needed to complete a link between Woodman Avenue and Van Nuys Blvd; the estimated cost is \$42.3 million and the project is currently on hold until a funding source is determined.</p>			
Service Challenges			
<p>City and regional growth will result in increased vehicle travel and reduce average travel speeds. Several street infrastructure needs within the City are unfunded. There is a lack of capacity on several streets throughout the City that causes traffic congestion and deterioration of streets surfaces.</p>			
Notes:			
(1) Daily vehicle miles of travel (DVMT) in 2004, according to the California Department of Transportation.			
(2) Miles of public roads for which the local agency bears maintenance responsibility, according to the California Department of Transportation Highway Performance Monitoring System.			
(3) Street maintenance and reconstruction expense, as reported in the FY 03-04 Annual Street Report to the State Controller.

Facilities			
Infrastructure Description		Needs/Deficiencies	
34,000 feet of closed storm drains and 4,358 feet of open channels maintained by the City. The Santa Monica Urban Runoff Recycling Facility (SMURRF) treats, cleans, and reuses up to 500,000 gallons of runoff per day from the Pico-Kenter and Pier Storm Drains.		The City needs capital improvements for stormwater discharge; the stormwater management program is funded \$150,000 annually.	
(1) Information is based on Los Angeles County Regional Water Quality Control Board's FY 03-04 Municipal Stormwater Permit Annual Reports. (2) Agencies are asked to rate their level of compliance with their stormwater permit on a one to 10 scale as part of their annual report to the Regional Water Quality Control Board.

Notes:

(1) The Integrated Waste Management Act (IWMA), also known as AB 939, required each jurisdiction on the state to submit detailed solid waste planning documents for approval by the California Integrated Waste Management Board (CIWMB), and set requirements that agencies divert 50 percent of solid waste from landfills by 2000. The Board is authorized to extend agency compliance deadlines based on good-faith efforts and special circumstances. (2) Represents the proportion of the local agency's waste that was disposed at this particular site.

Facilities			
Infrastructure Description		Needs/Deficiencies	
0 miles of closed storm drains and 0 miles of open channels maintained by the City.		In various locations citywide, storm drain catch basins are in need of retrofit to prevent debris and trash from entering storm drains. The retrofit project is fully funded.	
(1) Information is based on Los Angeles County Regional Water Quality Control Board's FY 03-04 Municipal Stormwater Permit Annual Reports.			
(2) Agencies are asked to rate their level of compliance with their stormwater permit on a one to 10 scale as part of their annual report to the Regional Water Quality Control Board.			

Street Service

Service Configuration		System Overview	
Street Maintenance	Direct	Street Centerline Miles ²	48
Street Lighting	Southern California Edison	Arterials	14
Street Sweeping	Direct	Collectors	3
Traffic Signals	Direct	Local Roads	30
Service Demand		Rural Roads	0
Daily Vehicle Miles of Travel ¹	513,760	Signalized Intersections	48
DVMT per Street Mile ¹	10,768	Street Lights	2,563
Street-Related Expenditures³			
Street Maintenance	\$72,642	Lights & Signals	\$27,411
Infrastructure Needs/Deficiencies			
Sunset Blvd. is in need of \$4.7 million in pavement repairs. The City concrete and sidewalk repairs as well as paving and the funds the ongoing problem with approximately \$1 million annually. Several City streets and sidewalks need to be brought into ADA compliance.			
Service Challenges			
The level of service on West Hollywood's major arterials is generally at or above capacity levels. Sunset Boulevard and Santa Monica Boulevard are operating at level of service F and are the primary east-west arterial servicing the City.			
Notes:			
(1) Daily vehicle miles of travel (DVMT) in 2004, according to the California Department of Transportation.			
(2) Miles of public roads for which the local agency bears maintenance responsibility, according to the California Department of Transportation Highway Performance Monitoring System.			
(3) Street maintenance and reconstruction expense, as reported in the FY 03-04 Annual Street Report to the State Controller.
